*Courses required for Engineering Standing. A cumulative UK GPA of at least 2.5 and successful completion of all pre-major courses. Successful completion of the following courses with at least a 2.5 GPA: CHE 105, CIS 111/WRD 111, EGR 101, EGR 102, EGR 103 (or EGR 215 in lieu of EGR 101 and EGR 103), EM 221, MA 113, MA 114, MA 213, PHY 231, PHY 241, PHY 232, and PHY 242 and a C or better in each course. If a course is repeated, the best grade will be used for calculation of GPA in the above listed courses.

Δ Students taking ENG 101 (*ENGL 101*) and ENG 102 (*ENGL 102, ENGL 105, M L 199 or WGST 199*) should also complete COM 181 (*BIOL 203 or COMM 111*), COM 252 (*COMM 115 or 315*), COM 281 (*COMM 312*), or COM 287 (*COMM 311 or 319*).

§ Transfer students will take EGR 215, Introduction to the Practice of Engineering for Transfer Students, in place of EGR 101 and EGR 103.

v Students must complete both EGR 101 and EGR 103 to fulfill the UK Core Arts and Creativity requirement. Transfer students may satisfy the UK Core Arts and Creativity requirement by taking EGR 215.

\$ Online courses do not transfer. Chemistry labs must be in person.

*Technical electives listed on second page.

-continued-

Aerospace Engineering 2025-2026 (2)

*Technical electives can be chosen from the following list. At least three credit hours must come from either AER/ME 501 OR AER/ME 590.

AER 380 Topics in Aerospace Engineering (Variable Topics)

AER 395 Independent Work in Aerospace Engineering

AER 501 Mechanical Design with Finite Element Methods

AER 506 Mechanics of Composite Materials

AER 510 Vibro-Acoustic Design in Mechanical Systems

AER 513 Mechanical Vibrations

AER 514 Computational Techniques in Mechanical System Analysis

AER 516 Systems Engineering

AER/ME 530 Gas Dynamics

AER 531 Fluid Dynamics I

AER 532 Advanced Strength of Materials

AER 545 Aircraft Control and Simulation

AER 548 Aerodynamics of Turbomachinery AER 563 Basic Combustion Phenomena

AER 565 Scale Modeling in Engineering

AER 590 Applied CFD and Numerical Heat Transfer

AER 599 Topics in Aerospace Engineering (Subtitle required)

*Courses are required for Engineering Standing. A cumulative UK GPA of at least 2.5 and successful completion of the following courses with at least a 2.5 GPA: BIO 148, BIO 152, BME 201, CHE 105, CIS 110 / WRD 110, CIS 111 / WRD 111, EGR 101, EGR 102, EGR 103, MA 113, MA 114, MA 213, PHY 231, PHY 241, PHY 232 and PHY 242. Completion of BME 201 with a grade of C or better. If the course is repeated, the best grade will be used for calculation of GPA in the above listed courses.

Δ Students taking ENG 101 (*ENGL 101*) and ENG 102 (*ENGL 102, ENGL 105, M L 199 or WGST 199*) should also complete COM 181 (*BIOL 203 or COMM 111*), COM 252 (*COMM 115 or 315*), COM 281 (*COMM 312*), or COM 287 (*COMM 311 or 319*).

§ Transfer students will take EGR 215, Introduction to the Practice of Engineering for Transfer Students, in place of EGR 101 and EGR 103.

v Students must complete both EGR 101 and EGR 103 to fulfill the UK Core Arts and Creativity requirement. Transfer students may satisfy the UK Core Arts and Creativity requirement by taking EGR 215.

∞ Graduation Composition and Communication Requirement (GCCR) course.

[1] Four BME electives (BME 395, any BME course at a level of 400 or above excluding required courses).

[2] One engineering elective at a level of 300 or above that does not significantly duplicate content in required BME courses and is not a more elementary version of a required course, or a BME elective (BME 395, any BME course at a level of 400 or above excluding required courses).

-continued-

Biomedical Engineering 2025-2026 (2)

[3] One engineering or science elective. The engineering elective must meet the requirements described in #2 above. The science elective can include the following:***

[a] Chemistry: CHE 230 (*CHEM 341*)**, CHE 232 (*CHEM 342*)**, CHE 236**, CHE 550 (*BIOC 545, CHEM 445 or CHEM 545*)**

[b] Biology: BIO 208 (*BIOL 257*), BIO 302 (*ASBN 502*), BIO 315 (*BIOL 329 or 415*)**

[c] Biochemistry: BCH 401G**, BCH 419G**, BCH 501G**, BCH 520**

[d] Physiology: PGY 312, PGY 412G, PGY 417, PGY 431**

[e] ABT: ABT 360

[f] Other courses approved by the Director of Undergraduate Studies.

**Courses designated with two asterisks have prerequisites that are not included in the BME curriculum. Please consult the department or the instructor for special permission.

***All electives should be chosen in consultation with the student's advisor.

\$ Online courses do not transfer. Chemistry labs must be in person.

Chemical Engineering 2025-2026 (2)

[1] Engineering/Science Elective Structure. Students must select four courses as follows:

1. Chemical Engineering elective [CME 395***, 404G, 505, 523, 542, 552, 556, 570, 573, 580, 599]
2. Science/math elective (totaling three or more credit hours) that is not a more elementary version of a required course. [Students may combine multiple qualifying courses that total 3 credits (e.g. pre-medical students may wish to combine PHY 241 (***PHYS 295 or 301***), 242 (***PHYS 296***), and CHE 233]
 - a. Math (MA 321 (***ENGR 307, MATH 407 or MATH 508***), 322 (***ENGR 330 or MATH 325***), 416G, 432G, 433G, 471G (***MATH 501***), 481G)
 - b. Chemistry (CHE 226, 250, 510 and above)
 - c. Biology [BIO 148 (***BIOL 240***) and above]
 - d. Physics [PHY 241 and above]
 - e. Other courses by approval of Director of Undergraduate Studies
3. Engineering elective (level 300 and above) that does not significantly duplicate content in a core chemical engineering course (e.g. ME 330) OR a CME Elective (CME 395 & above).
4. Chemical engineering elective (CME 395 and above) OR one engineering elective (level 300 and above) OR one science/math elective as described above.

***CME 395 (3 credits) may be used to satisfy only one elective requirement

\$ Online courses do not transfer. Chemistry labs must be in person.

PHY 242 General University Physics Laboratory	1	<i>PHYS 296</i>			

*Courses are required for Engineering Standing. A cumulative UK GPA of at least 2.5 and successful completion of all pre-major courses. Successful completion of the following courses with at least a 2.5 GPA: CE 106, CE 211, CHE 105, CHE 107, CIS 110/WRD 110, EGR 103, EM 221, MA 113, MA 114, MA 213, PHY 231, and PHY 241 and a C or better in each course. If a course is repeated, the best grade will be used for calculation of GPA in the above listed courses.

Δ Students taking ENG 101 (*ENGL 101*) and ENG 102 (*ENGL 102, ENGL 105, M L 199 or WGST 199*) should also complete COM 181 (*BIOL 203 or COMM 111*), COM 252 (*COMM 115 or 315*), COM 281 (*COMM 312*), or COM 287 (*COMM 311 or 319*).

§ Transfer students will take EGR 215, Introduction to the Practice of Engineering for Transfer Students, in place of EGR 101 and EGR 103.

† Students must complete both EGR 101 and EGR 103 to fulfill the UK Core Arts and Creativity requirement. Transfer students may satisfy the UK Core Arts and Creativity requirement by taking EGR 215.

∞ Graduation Composition and Communication Requirement (GCCR) course.

-continued-

Civil Engineering 2025-2026 (2)

[1] STA 296 (**BIOL 350, BSTA 201 or MATH 109**) or STA 381 (**IE 360**).

[2] ME 220 (**ME 251**) or EM 313 (**ME 206 or 320**).

[3] Students are required to select two design electives from different areas. Choose from: CE 508, CE 519, CE 531 or CE 533, CE 534, CE 549, CE 551 or CE 599, CE 579, CE 589. Design elective courses are typically taught once a year.

[4] Technical Electives are to be chosen from any of the courses at the 300-level or above that carry a CE prefix and in which a student is qualified to enroll, exclusive of required courses. Engineering elective courses are typically taught once a year.

[5] Math/Science/Technical Elective Options: MA 321 (**ENGR 307, MATH 407 or MATH 508**), MA 322 (**ENGR 330 or MATH 325**), CHE 230 (**CHEM 341**), CHE 236, EE 305 (**ECE 252**), EES 550, EES 560, EES 585, MNG 551 or the other half of the Engineering Science Elective in (2), or Technical Elective as defined in (4).

\$ Online courses do not transfer. Chemistry labs must be in person.

∞ Graduation Composition and Communication Requirement (GCCR) course.

†† Technical elective may be selected from upper-division engineering, mathematics, statistics, computer science, physics, or other technically-related fields excluding more elementary version of required courses. To be selected in consultation with academic advisor. If a student wishes to use CS 499 instead of CPE 490 and CPE 491 to fulfill the GCCR and senior design requirements, the student must receive approval from the DUS to select an additional technical elective that supports the proposed CS 499 project.

-continued-

Computer Engineering 2025-2026 (2)

††† 400-level CS courses and 500-level CPE and EE courses with emphasis in the computer engineering area. To be selected in consultation with academic advisor.

€ Hardware electives are senior level courses in the CPE or EE disciplines and shall be selected from the following list and/or selected in consultation with academic advisor:

EE 582 Hardware Description Languages and Programmable Logic

CPE 584 Introduction of VLSI Design and Testing

CPE 585 Fault Tolerant Computing

CPE 586 Communication and Switching Networks

~ Software electives are senior level courses in the CPE or CS disciplines and shall be selected from the following list and/or selected in consultation with academic advisor:

CS 441G Compilers for Algorithmic Languages (fall only)

CS 471G Networking and Distributed Operating Systems

CS 570 Modern Operating Systems

CPE 588 Real-Time Computer Systems

****EE Technical Electives (must be 500-level courses).** Courses recommended as electrical engineering technical electives are listed below (each course is 3 credit hours):

EE 503 Power Electronics
EE 511 Introduction to Communication Systems
EE 512 Digital Communication Systems
EE 513 Audio Signals and Systems
EE 517 Advanced Electromechanics
EE 518 Electric Drives
EE 522 Antenna Design
EE 523 Microwave Circuit Design
EE 525 Numerical Methods and Electromagnetics
EE 526 Lean Operations Management I
EE 527 Electromagnetic Compatibility
EE 528 Automotive Body Welding
EE 531 Alternative and Renewable Energy Systems
EE 532 Smart Grid: Automation and Control of Power Systems
EE 533 Advanced Power System Protection
EE 535 Power Systems: Generation, Operation and Control
EE 536 Power System Fault Analysis and Protection
EE 537 Electric Power Systems I
EE 538 Electric Power Systems II
EE 539 Power Distribution Systems
EE 543 Solar Cell Devices and Systems for Electrical Energy Generation
EE 546 Electric Power System Fundamentals
EE 549 Power and Energy Experiences
EE 555 Introduction to Micro-/Nano-Electromechanical Systems
EE 560 Semiconductor Device Design
EE 566 Engineering Optics
EE 567 Introduction to Lasers and Masers
EE 569 Electronic Packaging Systems and Manufacturing Processes
EE 571 Feedback Control Design
EE 572 Digital Control of Dynamic Systems
EE 576 Cybersecurity
EE 578 Process Monitoring and Machine Learning
EE 579 Neural Engineering: Merging Engineering with Neuroscience
EE 580 Embedded System Design
EE 582 Hardware Description Languages and Programmable Logic
EE 583 Industrial Energy Utilization and Assessment
EE 584 Introduction of VLSI Testing and Design
EE 585 Fault Tolerant Computing
EE 586 Communication and Switching Networks
EE 587 Microcomputer Systems Design
EE 588 Real-Time Computer Systems
EE 589 Advanced VLSI
EE 599 Topics in Electrical Engineering (Subtitle required)

Sophomore Year - Second Semester			Senior Year - Second Semester		
ME 220 Engineering Thermodynamics I	3	<i>ME 251</i>	ME 412 ME Capstone Design II	3	
ME 251 Introduction to Materials and Manufacturing Processes	3		Technical Elective††	3	
MA 214 Calculus IV	3	<i>ENGR 205 or MATH 405</i>	Technical Elective††	3	
EM 313 Dynamics	3	<i>ME 206 or 320</i>	UK Core* – Citizenship - US	3	
Guided Elective^ or UK Core* – Humanities	3		UK Core* – Global Dynamics	3	
Guided Elective^ or UK Core* – Statistical Inferential Reasoning. Recommended: STA 210 Making Sense of Uncertainty: An Introduction to Statistical Reasoning or STA 381 Engineering Statistics – A Conceptual Approach	3	<i>IE 360</i>			

*Courses required for Engineering Standing. A cumulative UK GPA of at least 2.5 and successful completion of all pre-major courses. Successful completion of the following courses with at least a 2.5 GPA: CHE 105, CIS 111/WRD 111, EGR 101, EGR 102, EGR 103 (or for transfer students EGR 215 in lieu of EGR 101 and EGR 103), EM 221, MA 113, MA 114, MA 213, PHY 231, PHY 241, PHY 232, and PHY 242 and a C or better in each course. If a course is repeated, the best grade will be used for calculation of GPA in the above listed courses.

Δ Students taking ENG 101 (*ENGL 101*) and ENG 102 (*ENGL 102, ENGL 105, M L 199 or WGST 199*) should also complete COM 181 (*BIOL 203 or COMM 111*), COM 252 (*COMM 115 or 315*), COM 281 (*COMM 312*), or COM 287 (*COMM 311 or 319*).

§ Transfer students will take EGR 215, Introduction to the Practice of Engineering for Transfer Students, in place of EGR 101 and EGR 103.

† Students must complete both EGR 101 and EGR 103 to fulfill the UK Core Arts and Creativity requirement. Transfer students may satisfy the UK Core Arts and Creativity requirement by taking EGR 215.

¶ To be selected from UK Core courses in consultation with the academic advisor.

^Guided Elective – choose one course from the approved list.

**Graduation Composition and Communication Requirement (GCCR) course.

***Mathematics Elective – choose one course from approved list.

††Technical Elective – choose 9 hours from approved list.

\$ Online courses do not transfer. Chemistry labs must be in person.

-continued-

Mechanical Engineering 2025-2026 (2)

Guided Elective

Choose one of the following:

CHE 107 (**CHEM 202**) General College Chemistry II

CS 115 Introduction to Computer Programing

CS 215 (**CSE 130**) Introduction to Program Design, Abstraction and Problem Solving

*ME 380 (**ME 575**) Topics in Mechanical Engineering (Subtitle required)

*ME 501 (**ME 512**) Mechanical Design with Finite Element Methods

or

*ME 590 Computational Fluid Dynamics

*If not used in the Major Requirements above.

Mathematics Elective

Choose one course from the following:

MA 320 (**MATH 561**) Introductory Probability

MA 321 (**ENGR 307, MATH 407 or MATH 508**) Introduction to Numerical Methods

MA 322 (**ENGR 330 or MATH 325**) Matrix Algebra and Its Applications

MA 416G Introduction to Optimization

MA 432G Methods of Applied Mathematics I

MA 433G Introduction to Complex Variables

MA 481G Differential Equations

STA 381 (**IE 360**) Engineering Statistics – A Conceptual Approach

Subtotal: Mathematics Elective 3 hours

Technical Electives

Choose 9 hours from the following:*

ME 380 (**ME 575**) Topics in Mechanical Engineering (Variable Topics)

ME 395 (**ME 588**) Independent Work in Mechanical Engineering

ME 416 Automotive Painting Technology

ME 417 Sheet Metal Forming

ME 418 Automotive Assembly and Quality Control

ME 501 (**ME 512**) Mechanical Design with Finite Element Methods

ME/MFS 503 Lean Manufacturing Principles and Practices

ME/MFS 505 Modeling of Manufacturing Processes and Machines

ME/MSE 506 Mechanics of Composite Materials

ME/MFS 507 Design for Manufacturing

ME 510 Vibro-Acoustic Design in Mechanical Systems

ME/MFS 511 Machining of Materials and Applications

ME/MFS 512 Manufacturing Systems

ME 513 Mechanical Vibrations

ME 514 Computational Techniques in Mechanical System Analysis

ME 515 Rotordynamics of Turbomachinery

ME 516 Systems Engineering

ME/EE/MFS 526 Lean Operations Management I

ME 530 Gas Dynamics

ME 531 Fluid Dynamics I

ME 532 Advanced Strength of Materials

ME 542 Kinematic Synthesis of Mechanisms

ME 548 Aerodynamics of Turbomachinery

ME 549 Power Generation

ME/MFS/CME/MSE 554 Chemical and Physical Processing of Polymer Systems

ME/EE/MSE 555 Introduction to Micro-/Nano-Electromechanical Systems

ME/MFS/CME/MSE 556 Introduction to Composite Materials

ME 560 Engineering Optics

ME 563 Basic Combustion Phenomena

ME 565 Scale Modeling in Engineering

ME/BAE 580 Heating, Ventilating and Air-Conditioning

ME/BAE/EGR/MFS/EE 583 Industrial Energy Utilization and Assessment

ME 590 Applied CFD and Numerical Heat Transfer

ME 599 Topics in Mechanical Engineering (Subtitle required)

Non-ME Technical Electives

BAE 502 Modeling of Biological Systems

BAE 515 Fluid Power Systems

BAE 516 Control of Off-Road Vehicles

BME 440 Introduction to Biomedical Signal Processing

BME 472 Human Biomechanics

BME 473 Fundamentals of Biofluid Mechanics

BME 488 Introduction to Biomaterials

BME 532 Modeling of Physiological Systems

BME 540 Biomedical Instrumentation

BME 550 Introduction to Biomedical Imaging

BME 571 Mechanical Modeling of Human Motion

BME 573 Cell Mechanics and Mechanobiology

BME 579 Neural Engineering: Merging Engineering with Neuroscience

EGR 523 Concepts, Assessment Tools and Methods in Sustainable Power and Energy

EGR 537 Numerical Analysis

EGR 540 Power Economics and Public Policy

EGR 542 Electric Power Generation Technologies

EGR 546 Electric Power System Fundamentals

EGR 553 Environmental Consequence of Energy Production

MFS 509 Leadership for a Lean Enterprise

MFS/MNG 520 Industrial Automation and Control

MFS 581 Quality Control

MFS 599 Topics in Manufacturing Systems Engineering (Subtitle required)

MSE 201 Materials Science

MSE/CME 552 Automotive Plastics

*A minimum of 6 credit hours (two courses) must have an ME prefix or be cross-listed as an ME course. A maximum of 3 credit hours (one course) may be chosen from technical electives with prefixes other than ME. Exceptions only with the approval of the Director of Undergraduate Studies.

University of Kentucky Pigman College of Engineering

Mining Engineering 2025-2026 (Pathway from University of Louisville)

Mining Engineering 2025-2026 (2)

****Courses recommended as technical electives are listed below. These courses must be chosen with the approval of the student's advisor to ensure that the curriculum includes sufficient engineering design content.**

Technical Electives: Students are required to select their technical elective from the departmental courses listed below:

MNG 511 Mine Power System Design

MNG/MFS 520 Industrial Automation and Control MNG 531 Advanced Blast Design and Technology

MNG 541 Computer Design of Mine Ventilation Systems

MNG 542 Power Generation Technologies

MNG 555 Advanced Geomechanics I MNG 575 Coal Preparation Design MNG 585 Applied Surface Chemistry

MNG 599 Topic in Mining Engineering (Subtitle required)

\$ Online courses do not transfer. Chemistry labs must be in person.
